# ALL SERVICES

## WORDPRESS MAINTENANCE

**SKU:** 012

We make the maintenance of your WordPress website. What's is included:

- WordPress version update.
- Plugin updates (if premium plugins need to be updated with some cost, this cost should be paid from Site Owner separately and not included in the maintenance).
- Brute force login attacks protection.
- Downtime monitoring.
- Performance and speed (load pages faster by allowing plugin to optimize your images and serve your images and static files (like CSS and JavaScript) from the global network of servers).
- Site accelerator (speed up image load times, speed up static file load times, lazy loading for images).
- Priority support.
- Daily backup (30-day backup archive - never lose a word, image, page, or time worrying about your site).
- Spam protection (automatically clear spam from comments and forms).
- Priority support.

**Tags:** [maintenance services](#), [subscriptions](#)

## WORDPRESS SECURITY

**SKU:** 013

We make the security control of your WordPress website. What's is included:

- WordPress firewall (includes a Web Application Firewall (WAF) that identifies and blocks malicious traffic).
- WordPress security scanner (checks core files, themes and plugins for malware, bad URLs, backdoors, SEO spam, malicious redirects and code injections).
- Hide login URL.
- Priority support.
- Real-time IP blacklist (blocks all requests from IP addresses that are actively attacking).
- Real-time firewall rule updates (leverages firewall rules to identify and block malicious traffic).
- Real-time malware signature updates (rely on thousands of malware signatures to help identify malware on your website and to block malicious uploads).
- Reputation checks (check to see if your site or IP have been listed on blacklists).
- Country blocking (designed to stop an attack, prevent content theft or end malicious activity that originates from a geographic region).
